

1 **ABSTRACT OF THE DISCLOSURE**

2 A composite golf club head includes a light-weight alloy strike plate, a
3 composite material body, a metal sole plate and a balance weight. . The strike
4 plate has a rear, and a rim is formed around the rear to form a hollow cup-like
5 body. The body is bonded to the rim and is composed of a crown and a sole made
6 of fiber prepreg material. A sole plate made of metal is mounted in the sole, and
7 has a seat formed in the sole plate and a hole defined through the seat. A balance
8 weight is mounted in the hole.
